

THE HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY

ISOM 3540 Introduction to Probability

Course Outline

Instructor: Dr. Mike So
Tel: 2358 7726
Email: immkpso@ust.hk

Office: LSK, Room 4075

Tutor: Emil Chan
Tel: 3469 2634
Email: imechan@ust.hk

Office: LSK, Room 4049C

Course description

This course presents basic probability concepts and techniques. Topics like conditional probability, expectation, random variables, discrete and continuous distributions, joint distribution, dependence measures and limit theorems, etc, will be discussed. Modern applications in business, economic, finance and marketing are also presented.

Tentative schedule

1. Combinatorial analysis
2. Axioms of probability and conditional probability
3. Discrete random variables
4. Continuous random variables
5. Joint distributions
6. Properties of expectation
7. Dependence measures
8. Ideas of Bayesian decision
9. Limit theorems

Grading

Assignments	25%	
Midterm exam	25%	[1 November 2022 (Tuesday), in the lecture]
Final exam	50%
